

Finally, Security Awareness Employees Will Love!

THE NEW SECURITY AWARENESS

Entertaining. Educational. Enlightening.

About the Workshop:

The attendees practice knowing when they are being tricked, defrauded, manipulated, socially engineered, or hacked. They practice response actions. They learn to feel when something isn't right and to react. This workshop will dramatically improve security for all attendees to help create a sustainable culture of security in the workplace.

ISECOM workshops and trainings are known internationally for their high quality and expert trainers. ISECOM clients include financial businesses on Wall St., Energy sector and Power Plants, high schools and universities, the Vatican, all branches of the Armed Forces and government and science agencies such as NATO, CERN, NIST, Dept. of Treasury, NSA, FBI, NASA, and the Whitehouse.

What Attendees Will Learn:

- Who you are online and what it means.
- Techniques against criminal hacking, identity theft, phishing, fraud, and information leaks.
- Techniques to keeping information private.
- How to react and respond.

What Students Will Get:

- Participation in fun tricks and exercises that let you see how good you are keeping the criminals away.
- An easy-to-follow, easy-to-remember way to always maintain information security.
- Straight answers from the OSSTMM, the international standard for security testing and analysis.

"I love the ISECOM courses, they are the most interesting courses I have followed so far and I intend to do more of them."

- Michael Barbier, Fiducia X

"Pete is an excellent example of what a well-meaning intelligent person can do to change the world. I am always happy to deal with him, and I think he brings a lot of value to the table."

-Fred Cohen, CEO, Management Analytics

About the Workshop Instructor

Pete Herzog, is the Managing Director of the open, non-profit, security research organization ISECOM. Pete is the creator and main writer of the OSSTMM and Hacker Highschool projects and is an active security researcher in neuro-hacking. He is an award-winning presenter and teacher with the ability to entertain and pass new concepts with ease. Pete's background includes research in security, neuroscience, child and teen development, and psychology which he applies to the projects he's involved in. He is an avid hacker, regular presenter, and teacher, having taught for years in Barcelona at La Salle University and the ESADE MBA program.

About ISECOM

ISECOM is a open, security research organization established in 2001 as an open source community and registered as a non-profit in 2003 with the mission to "Make sense of security."

SPECIAL Workshop fee: \$2499.00 available during June 2014 tour for up to 25 attendees. Discounts available.
